

**Home Visiting Programs**

**Program Goals**

A voluntary evidence-based program **Supporting Families Right From The Start** to promote optimal prenatal care, improve maternal and child health and development. HFRC helps to improve outcomes for families with adverse childhood experiences through home visits that are provided on a weekly, bi-weekly and/or as needed basis to:

- Support parent-child bonding and relationships
- Promote child & family health, development & safety
- Enhance family self-sufficiency

The Maternal and Infant Community Health Collaboratives (MICHC) It's About You home visiting program link underserved women and families to providers of health, social and community services within the community. Through these efforts we will reach our goal of improving birth outcomes.

Our work includes:

- Advocacy
- Education on maintaining Healthy Behaviors
- Timely Coordination of referral and follow-ups for pregnant and postpartum women
